It must be noted that at any one time there are multiple other consultants "on call" within the medical department and seeing patients on the Acute Medical Unit as part of the Morning Report. They are not included in these numbers

These include

24/7 Respiratory Consultant

24/7 Cardiology consultant

24/7 Stroke consultant

These are not accounted for in the figures

Also because of the complicated nature of the shift patterns it is not feasible to be more accurate with numbers than those listed as for different consultant's shifts start and finish at different times of the day on weekdays and weekends.
