

# Request title: Tenease Clinical Trial 2012-2014

---

Date of Response: 31<sup>st</sup> March 2016

Further to your Freedom of Information request, the Trust has answered your questions in the order they appear in your request.

## Request

Having trolled the internet I saw your hospital had conducted a clinical trial on "Tenease" for use in Lateral Epicondylitis (tennis elbow), however I cannot find the outcome/trial results and am interested due to severe pain with this condition.

I wondered if this information is available at all? The trial was conducted from 2012 – 2014.

## Reply

The Trust is not able to provide the information that you have requested due to the fact that the Tenease clinical trial is still on-going. Currently the Trust has recruited 48 out of the target of 50 patients required in order to complete this trial. This information can only be provided once the study has been completed, analysed and written up.
