Supportive Underwear List

Buying a supportive bra can be quite a challenge as there are many different styles available. The list we have compiled will hopefully give you an idea of what you should be looking for and what we would recommend post-reconstruction/post-surgery. The prices will vary (prices based on Sept 2020). The main features of a bra will also vary, with some including pockets for a prosthesis, front or back fastening and the depth of the band around the bra itself. We would ask you not to purchase a sports bra that goes on over your head (racer back style) as with some surgical procedures we will need you to restrict your arm/shoulder movements. Where possible, please avoid buying a zip fronted bra. These can be difficult to fit post-operatively, particularly if you are very swollen. Essentially, the bra you choose needs to provide adequate support for the breast and be comfortable to wear night and day for around 6 weeks following your surgery. The diagram below identifies the features that we ask you to look for when buying your post-op bra.

If you are having abdominal based reconstruction (or lipofilling), you will need to purchase some firm support pants which come over your tummy button and support the whole of your tummy. We would advise that you wear these day and night for 6 weeks following your surgery. You can wear cotton pants underneath them so that you do not need to change them every day.

1. Adjustable shoulder straps
2. Front-fastening, hook and eye
3. Full cup coverage
4. Good separation between cups
5. Generous underarm support
6. Elastic binding around neckline
7. Soft breathable pockets
8. Supportive under band
Marks and Spencer
You may find a suitable bra in the ‘sports bra’ section. This will need to be front fastening, ideally with a hook and eye so extenders can be used when required.

Debenhams
You may find a suitable bra in the ‘sports bra’ section. This will need to be front fastening, ideally with a hook and eye so extenders can be used when required.

Bra Extenders
Bra extenders available from M&S, Waitrose, John Lewis, Amazon or online. We do have a supply of bra extenders kindly donated to us from the Breast Cancer Support Fund that are available for a small donation.

Compression Belt
Your surgeon may recommend that you purchase a compression belt ahead of your reconstruction. These are available from www.amoena.com and cost approximately £15. We only use these occasionally and your surgeon will request this if he/she feels it is necessary.
