

Lung Multi-Disciplinary Team Meeting (MDT)

The Lung Cancer and Mesothelioma Specialist team reviews ALL patients with suspected or diagnosed lung cancer or mesothelioma.

The team meet weekly to discuss and review CT scans, PET scans, the results of biopsies and lung function tests.

The need for further tests is considered and treatment plans are formulated.

The team consists of:

- Consultant Radiologists (x-ray specialists)
- Respiratory Consultants and junior staff (chest specialists)
- Consultant Thoracic Surgeons
- Consultant Clinical Oncologists (cancer specialists)
- Lung Specialist Nurse (Key Worker)
- Supportive and Palliative Care Nurse
- MDT Co-ordinator

You will be given a key worker/specialist nurse.

This is someone who:

- Will help co-ordinate your care from diagnosis to treatment, through to follow-up care.
- Be a familiar face who can provide support for you and your family.
- Provide information on tests, investigations and treatment options.
- Be a support and advise on symptom control.
- Link to other professional and support services.

Your key worker is
