

Gynaecology Multidisciplinary Team (MDT) Meetings

Your cancer treatment is provided by a team of experts. The team includes Doctors, Nurses and other Health Professionals working together as part of a specialist cancer team.

Teams work together to share their expertise and discuss the best course of action for their patients.

You may not meet all your cancer team together at one time, but may see different members who are relevant to your current treatment and care. The specialists you may see include:

- Consultant Gynaecological Oncologist Surgeon (Surgeons with specialist qualifications in cancer surgery)
- Consultant Clinical Oncologists (Cancer specialists offering treatment with radiotherapy and chemotherapy)
- Consultant Medical Oncologists (Cancer specialists offering chemotherapy)
- Gynaecology/Oncology Clinical Nurse Specialists
- Gynaecology/Oncology Support Worker
- Specialist Radiographer
- Consultant Radiologists
- Consultant Histopathologists

The Gynaecology Oncology Team meets weekly to discuss and review their patients. At this meeting all stages of your treatment are discussed by the Multidisciplinary Team. This will include reviewing any scans and reviewing

results of any biopsies that may have been taken from all patients suspected or diagnosed with a Gynaecological cancer.

You will be seen by your Consultant to discuss the results of any biopsies and/or scans.

If you would like a copy of your treatment plan/ copy of the letter that your Consultant will send to your GP, please advise your Consultant or Specialist Nurse/Key worker.
